*Identificativo proposta:* BOTR20190624001 **RICHIEDI MAGGIORI INFORMAZIONI**

A Turkish company develops hospital information systems, to provide reuse of electronic registers of patients' examination, medicine, material, operation, admission, reports and all healthcare corporation/organization services, examining quickly every application of a patient. They are looking for partners under a commercial agency agreement.

A Turkish company offers its software to deliver its desktop, web and mobile compatible products to new markets. With the hospital information system offered, all personal information of a patient and all operation information with contact information of a patient are being kept safely. Every committed operation, every registered data are being kept safely and can be examined separately. Searching options with parametric examination screens and search forms according to multiple choice features (name, affinity, gender etc.) are being offered. Quick and easy access to information is being provided with user friendly, flexible and useful search interface. Vital warnings which belong to patient (allergy, diabetes, hypertension etc.) are displayed automatically in electronic patient card. So, staff of a healthcare corporation/organization is informed by the system in every stage. A Turkish company is looking for partners under commercial agency agreement.
