RICHIEDI MAGGIORI INFORMAZIONI

Automation projects and technology applied to Personalized Dosage Systems and pharmacy management as solutions for pharmacies, hospitals and nurse homes. The company deals with 25 countries on the five continents and is willing to expand within more countries, the countries are UK, Germany, France, Belgium, Denmark, Colombia, Thailand. Therefore, they are open to commercial agency, distribution services and or manufacturing agreements.

The Pharmaceutical Spanish Company based in Mallorca since 2009 F approach different ways to focus on pharmacy automation systems, from PDS in pouches or blisters (where the patient receives the dose directly prepared on deblistered pills/capsules and by taking time) with a range of machines Farma Z80C (the newest one, able to generate a blister in less than a minute), Farma-L or Farma -RB, to the dispensation of boxes of medication, ampoules, refrigerated drugs and other products as injections/syringes, compresses, everything can be automated. There are different automation levels, so can cover a very basic systems as the led-guided shelves for the collection of the drug of a dispensation, to the double-armed dispensing machines with automated charge, which are slower but more automated solutions, to the machines which dispense the medication at a higher speed to a conveyor belt that regroup them all in a dispensation basket or pharmacy collection points. There are different kinds of box robots, with different functions, speeds, fully automated, semi-automated, shelves, cabinets, and others. Machines: - Series L: System of handles, ranging from 52 to 405 calibrated canisters for a medicine, in machine. - R Series: Rotation system, ranging from 198 to 352 calibrated canisters, in machine. - Farma-Rapid Series: Tray system. Without calibrated canisters. With high production speed. Tablet packager 90 cells - Farma Z80C, a blister generator machine Apart from PDS machines, we present other robots for different purposes: - Vision and Vision FZ, for technical inspection, doses review and maximum control - Unbundling machine, to save time and avoid this boring task - Farmablister, developed to carry out personalized packaging safely As well offers a genuine blister (weekly blister): the Blister One, the definitive solution to ensure the medication adherence. This product accomplishes all health and medical regulations and it is registered on the SIGRE system (the system to recycle or reuse the medication packs, expired medications and more, in order to end the lifecycle of these products). The target of the company is to expand internationally, therefore they are open to commercial agents, distributors and as well to manufacturing agreements.
