RICHIEDI MAGGIORI INFORMAZIONI

The company was established in 2008 in Romania. For more than 12 years from its founding, it has developed proof of experience in offering professional solutions for web technologies and graphic design, being able to provide a complete customizable web service product. The result can be either a simple web site, or a complex e-commerce platform solution. The company is interested in extending on international markets, by offering its web tech services through a commercial agency agreement.

The Romanian SME has invested continuously from its foundation in 2008, in its logistic and operational capacity and also focus on diversifying the range of tech web services offered, including also graphic design and multimedia presentations. As such, nowadays, the company is able to offer the following services: - Web design: by providing the full range of web services from company presentation sites or product sites to virtual stores or even web portals dedicated to an entire community. Its clients benefit from included hosting services and an unlimited number of email addresses. The company can also offer advertising packages for sites or business through well-known web providers on the targeted market or through Google AdWords campaigns; - Design for printed materials: by offering the highest quality design services for any type of printed materials. Whether its posters, banners or flyers, business cards, brochures or presentation folders, the customers can confidently call on the company's services. It also can offer Logo and visual identity creation services; - Multimedia presentations: whether it's a short presentation of the client's company or an interactive CD to accompany a publication or a magazine, the Romanian company offers the latest technologies available on the market. The company can also make short interactive games or educational software using Adobe Flash / Flex technology. Being considered a full service stack provider, the company starts its journey with identifying the needs and helps the customer to shape its idea in such a way that he will get the most out of it. All though nowadays there are several web development companies out there, the Romanian SME considers that the most important way to value its customers is to stand out and become a service provider that can deliver a complete and customizable product. By doing this, is able to cover all areas of activity of interest to the client. The company seeks international partners specialized in the open-market web solutions based on software-as-a-service type of provider, in order to conclude a commercial agency agreement.
